

The Azerbaijan State Oil Academy from the small educational institution has turned into the largest industrial body which has prepared and has let out more 100 thousand highly skilful engineers, hundred PhD and Doctors of science.

Students of Oil Academy Today can be met everywhere, it is a difficulty to list all the places, where these remarkable graduates of institute labor.

The staff graduated from this institute (Oil Academy) contained the backbone of engineering-technician and scientific workers of Azerbaijan in the field of oil, chemistry, geology, oil refinery, machine construction, architecture and so on..

Absolutely, great number of scientific-research institutes staff of academic sciences, field scientific-research institutes, project institutes, dealing with industry and especially with oil, oil refinery, oil chemistry, machine construction-the students of Oil Academy

Taking into account the great contribution and the potential of the oil scientists and researcher workers employed in the Oil Academy, the Cabinet of Ministry of the Republic of Azerbaijan decided in 1992 to establish within the Academy the Scientific research Institute "Geotechnological Problems of Oil, Gas and Chemistry" The main directions of Institute are also:

- introduction of results of researches and development in a national economy and educational process;
